

Operating instructions for SF35 systems

To open:

1. Release handle on first opening panel (panel 1) and open to 90°.
2. Slide Panel 2 away from Panel 3 to allow hand to be positioned on side of glass panel at approximately $\frac{3}{4}$ height.
3. With hand in this position, slide panel firmly to stacking end of track.
4. With panel pushed firmly up to end of track it will then be possible to turn panel 90° to stack in front of Panel 1 and fasten to Panel 1, using panel clip located at top of panel.
5. Repeat steps 2-4 to open remaining panels.

To close:

1. Unclip front panel from stack and swing round 90° into line of tracking.
2. Position hand on opposite side of glass panel to that when opening doors, ensuring hand is approximately $\frac{3}{4}$ height.
3. With hand in this position, slide panel firmly up to end of track.
4. Repeat steps 1 and 2 for remaining panels, ensuring panels are pushed fully up to the edge of the previous closed panel.
5. Lastly, swing round panel and locate in closed position.
